TOLERANCE: +/- 1.5mm

Lamps are manufactured to provide the same, if not better, performance than the Original Equipment Manufacturer (OEM). All Lamps come with a one year manufacturers warranty. There is virtually no difference between UV Resource amp performance and those of the OEM.

Many of the designations used by the manufacturers and sellers to distinguish their products are claimed as trademarks. Where those designations appear on our website, drawings or price sheets, and where UV Resources is aware of the trademark, the first occurrence of the designation is printed with a (®) or a (™) symbol. UV Resources is not affiliated with any of the above noted companies.
